Excerpt: . . . be taken to be the one giving the least energy loss under service conditions provided it did not develop some undesirable characteristic such as acidity or drying out rapidly to a gum, etc. , when in use0 There are two radically different classes of service to be considered, namely, lubrication of bearings and the lubrication of engine cylinders. The conditions in bearings are simpler and easier to meet. The temperatures are usually moderate and the direction of motion, the speed and the pressure constant. For these reasons a number of machines have been built to measure the friction in bearings. Professor Thurston0s apparatus in which a split bearing is clamped on the shaft by spring pressure, thus giving an oil film thickness that depends on the constants of the oil as in railroad car bearings and Professor Stribeck0s 2in which a solid-shell ring-oiled bearing...

### Reviews

*This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Brennan Koelpin**

*Comprehensive guide! Its this type of very good read through. It is actually written in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.*
