From observing nature s methods in other departments of science - how, through the action of physical laws, physical results are obtained - the conviction grew upon me that physical law would furnish the key that would unlock our problem. The subject was so complex, the observed phenomena were apparently so diverse and even contradictory, that a long time elapsed before I was able to report any progress. In 1887 I published the first results which I obtained by this method. Notwithstanding the subject was still very hazy at that time, I could see how the laws of wave-motion, when applied to the motion of organic molecules, would explain some of the phenomena of contagion, but the complete elucidation of the subject had not yet dawned upon me. Francis Galton says: Few intellectual pleasures are more keen than those enjoyed by a person who, while he is occupied in some special inquiry, suddenly perceives that it admits of a wide generalization, and that his results hold good in previously unsuspected directions. While thinking over the phenomena of contagion and immunity, and the laws of wave-motion, the beautiful law of interference occurred to me, when it flashed over me that the application of this law to molecular wave-motion completed the chain of evidence. I felt very much as I imagine did Archimedes when he sprang from his bath and ran naked, shouting Eureka, through the streets of Syracuse. Time will not allow an attempt to...
