

## Prototype Notebook: Short Questions on Dietary Intake, Knowledge, Attitudes, and Behaviors

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 174 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This report provides a compendium of 128 survey questions used in previous research to assess dietary knowledge, attitudes, and behaviors for low-income populations over the age of 18. The short questions or sets of questions on nine topics, including fruits and vegetables; grains, legumes, and fiber; variety; fat; calcium food sources; nonalcoholic beverages; knowledge, attitudes; and behaviors, are drawn from an extensive inventory and evaluation of available questions reported in the research literature. Each question is presented using a common template including the citations, data sources, and characteristics such as question reliability, validity, sensitivity to change, availability in other languages, mode of administration, use in populations with low-income and/or low-education levels, relation to nutrition and health outcomes, and availability of comparative data. This report is part of a larger ERS research effort to develop a common core set of questions to assess the dietary behavior impact of Food Stamp Nutrition Education (FSNE) on Food Stamp Program participants. This item ships from La Vergne, TN. Paperback.

### Reviews

*This pdf is wonderful. It is definitely simplified but excitement from the 50 percent in the ebook. You won't sense monotony at any time of your time (that's what catalogues are for relating to should you request me).*
